CONFERENCE OBJECTIVE

Comprehensive exchange of experience in the design and construction, reconstruction and restoration of modern architecture objects. Dissemination and development of advanced computer-aided design technology and the practical aspects its implementation. Popularization of modern efficient materials, construction and technological equipment. Improving the qualification level of specialist of architectural and planning, the design, construction, engineering and technical training program.

- **Meeting of nine parallel sections** – 25.11 – 27.11.2020, from 10⁰⁰ till 17⁰⁰. *(online)*.
- **Second plenary meeting, round table, Conference resolution adoption** – 27.11.2020, *(online)*.
- **Break** – 25.11 – 27.11.2020, from 13⁰⁰ till 14⁰⁰.
(Regulation may be subject to change)

CONFERENCE EXPOSITIONAL PROGRAM

During the Conference, the participants will be given the opportunity to present scientific and technical developments, new building materials and products, scientific and methodical publications, etc. *(online)*.

CONFERENCE SCIENTIFIC PROGRAM

Theme of section meetings:

SECTION 1. Architecture and Design. Theory of Architecture. Architectural design of civil buildings. Design of Architectural Environment. Landscape architecture. Architectural design. Information technologies in architecture, computer-aided engineering and design of architectural objects. Technical aesthetics, applied geometry. Energy and resource saving in construction and architecture.

SECTION 2. Urban planning and land use planning. Urban planning and land use planning. Urban planning information systems and City planning cadastre. Urban Construction and Management. Improving the efficiency of urban construction. Cadastre and land monitoring. Engineering geodesy, geoinformatics and photogrammetry.

SECTION 3. Construction, materials and design technology of building production. Structural mechanics. Building designs, buildings and constructions. Foundation Engineering. Numerical modeling of building structures. Construction materials and products. Construction Technology of production. Standardization and certification in construction..

SECTION 4. Engineering systems, automated systems and environmental aspects of construction. Heat and gas supply. Ventilation systems of buildings and constructions. Water supply and sanitation. Use of water and thermal energy resources. Automated systems and measuring systems. Electronics and electrical engineering. Ecological problems in construction and architecture. Technical thermal physics and industrial heat power. Energy efficiency of construction objects.

SECTION 5. Construction vehicles and equipment. Machines for the production of building materials and structures. Machines for earthworks, road and forestry engineering work. Handling machinery. Building Machinery Services.

SECTION 6. Organization, economics and management in construction. Organization of building production. Commodity and commercial activities. Construction Economics. Management in construction and architecture.

SECTION 7. Information Technology. Computer science. Information Technology. Information technology in education. Project and Program Management. Computer networks. Cybersecurity.

SECTION 8. Historical, socio-cultural, political, legal and philosophical aspects of architecture and construction development. Social-political development of society. Physical education and sports in the conditions of building production. History of Ukrainian culture. Pedagogy, philosophy and psychology of relationships in construction. Legal relations in construction and architecture.

SECTION 9. The newest vectors for the transformation of the construction sector: the dominant of the life cycle. Construction development and functional-technological modeling of construction project environments. Modeling of administrative structures and processes of construction management on the basis of BIM-tools and geometric econometrics.

Plenary meeting (ROUND TABLE). System solutions in design and construction. Energy saving and ecological concepts in the new architecture. Modern training and information projects construction industry.

PARTICIPATE IN THE CONFERENCE

1. **Registration** on the conference site.
2. **Upload** the abstract as an attached file on the conference site.
3. **Transfer the registration fee** in the amount that corresponds to the established terms of registration.

REGISTRATION OF PARTICIPANTS

Dear Colleagues!

For participation in the conference you should fill in the online application form on the conference website www.bmc-conf.com, which includes a report title, authors, abstract and selection of the thematic areas. It is necessary to upload abstracts according to the proposed sample on this site as an attached file. This can be done during the registration and thereafter.

The language of registration – is English or Ukrainian.

Please note that the maximum number of authors of one report - no more than four. For necessity, the information provided by you, can be edited.

You will be sent a separate letter about the registration of the participant.
